# **Stamford University of Bangladesh**

## **Lab Project Report**

**Course Title**: Software Engineering Sessional

Course Code : CSI 332

**Project Name**: Stamford Blood Donor System

**Submitted To**: Ashfaq Ali Shafin

Lecturer

Dept. of Computer Science Engineering

Stamford University of Bangladesh

**Submitted By**: Joydeb Paul Anupam ID: CSE 063 07447

Faisal Chakladar ID : CSE 063 07461

Sajib Roy ID : CSE 063 07511

Dept. of Computer Science Engineering

Stamford University of Bangladesh

**Date of Submission: 07 September 2019** 

#### **Introduction:**

It is Stamford University of Bangladesh based application. It is an application made for emergency. We want to create an application that will benefit the student and teachers of Stamford University of Bangladesh. This application called Stamford Blood Donation System. The application purpose is to help those who need blood when it needed.

### **Motivation for this Project:**

It is an application that is meant to help someone who needs blood donation. In daily life no one knows when an emergency blood donation is needed specially students who sometime panics don't know anyone who can donate blood when needed. This is why the Stamford Blood Donation System application is needed and the applications have all the information.

### **Project Goals:**

Our project goal is to help the student and the faculty member gain emergency blood when need. Cause no one knows when something bad happens and they don't know anyone in an area that they are not familiar with. Our app will help them send notification in that area donors with the blood type.

## **Project Feasibilities:**

Programming Language: Java,

❖ Database: Firebase

Operating System: Android

## **Project Scheduling:**

Task	Description	Precedence	Time(week/s)			
01	Planning	None	1			
02	Project Initiation	1	1			
03	System Design	1,2	2			
04	Database Design	1,2,3	4			
05	User Interface	1,2,3,4	1			
06	Admin Panel	1,2,3,4,5	1			
07	Coding	1,2,3,4,5,6	4			
08	Testing	1,2,3,4,5,6,7	2			
			Total Weeks = 16 weeks			

## **Gantt Chart:**

SI	Task Name	Start	Finish	Duration	###	9/6	9/14	9/20	9/27	10/4	10/11	10/18	10/25	11/1	11/8	11/15	11/22	11/29	12/6	12/13
1	Planing	31/08/19	6/9/2019	1 week																
2	Project Iinitiatio	######	13/09/19	1 week																
3	System Design	14/09/19	21/09/19	2 weeks																
4	Database Design	22/09/19	29/09/19	4 weeks																
5	User Interface	30/09/19	7/10/2019	1 week																
6	Admin Panel	08/010/19	15/010/19	1 week																
7	Coding	16/010/19	23/10/19	4 weeks																
8	Testing	24/10/19	31/10/19	2 weeks																

# **Information:**

Name	Student Id	Batch No	Blood Group	Phone Number	Area	Available

#### **Conclusion:**

Details of this project is documented in this to overview the features, feasibilities, project scheduling. This document also represents our interest for selecting this project and market value of this project. We hope to work forward efficiently in this project.
